

Table of contents

Introduction.....	9
On French heritage of Cartesian geometry in Elements from Arnould, Lamy and Lacroix	11
<i>Évelyne Barbin</i>	
Pólya and Dienes: Two men of one mind or one culture?	31
<i>András G. Benedek and Agnes Tuska</i>	
Problems in the teaching of arithmetic: records in French school notebooks (1870-1914).....	51
<i>Luciane de Fatima Bertini</i>	
Two textbooks on unconventional arithmetic: Reactions of influential persons	67
<i>Kristín Bjarnadóttir</i>	
Attitudes toward intuition in calculus textbooks.....	85
<i>Viktor Bläsjö</i>	
Daily life traits in arithmetic word problems: a glance at 1950s school notebooks.	95
<i>Elisabete Zardo Búrigo</i>	
Mathematical reasoning in trigonometric definitions, proofs, and calculations on early 19th century textbooks from Norway and Denmark	113
<i>Andreas Christiansen</i>	
Mathématique moderne: A pioneering Belgian textbook series shaping the New Math reform of the 1960s.....	131
<i>Dirk De Bock, Michel Roelens and Geert Vanpaemel</i>	
John Leslie's (1817) view of arithmetic and its relevance for modern pedagogy .	149
<i>Andrzej Ebrenfejcht and Patricia Baggett</i>	
Pedagogical value of the Russian abacus and its use in teaching and learning arithmetic in the 19 th – early 20 th century	163
<i>Viktor Freiman and Alexei Volkov</i>	
Jacob de Gelder (1765-1848) and his way of teaching cubic equations	179
<i>Henk Hietbrink</i>	

The mathematics teachers' journal <i>Euclides</i> in the Netherlands in change, 1945-1976.....	191
<i>Martinus van Hoorn</i>	
Dmitry Chizhov and the examination of mathematics textbooks in Russia during the 1820s-1830s.....	207
<i>Alexander Karp</i>	
Differential calculus in a journal for Dutch school teachers (1754-1764)	223
<i>Jenneke Krüger</i>	
Teaching mathematics in Moroccan high schools in the past fifty years	241
<i>Ezzaim Laabid</i>	
Anton Dakitsch collection – the scope of mathematics teaching in Brazilian industrial education in the 1950s	259
<i>Regina de Cassia Manso de Almeida</i>	
Didier Henrion, an enigmatic introducer of Dutch mathematics in Paris	271
<i>Frédéric Métin</i>	
Arithmetic in Joan Benejam's <i>La Enseñanza Racional</i> (1888)	285
<i>Antonio M. Oller-Marvén</i>	
Geometry for women in teacher training schools in the late 19th century in Spain.....	303
<i>Luis Puig</i>	
Building new mathematical discourse among practitioners in restoration and enlightenment England 1650 – 1750	321
<i>Leo Rogers</i>	
Norms and practices of secondary teachers' formation. The Portuguese case (1915-1930)	339
<i>Ana Santiago^a and José Manuel Matos^b</i>	
Let them speak; hear them speak — old Chinese wisdom on mathematics education.....	357
<i>SIU Man Keung</i>	
Dutch mathematics teachers, magazines and organizations: 1904-1941.....	373
<i>Harm Jan Smid</i>	

Views on usefulness and applications during the sixties.....	389
<i>Bert Zwaneveld and Dirk De Bock</i>	
Contributors.....	403
