Introduction	7
Klein's <i>Elementary Mathematics from a Higher Standpoint</i> – An analysis from a historical and didactic point of view <i>Henrike Allmendinger</i>	9
The influence of New School ideas in the preparation of mathematics teachers for <i>liceus</i> in Portugal from 1930 to 1969 <i>Mária Cristina Almeida</i>	21
Euclides Roxo's deductive geometry <i>Regina de Cassia Manso de Almeida</i>	33
Top-down: the Role of the <i>Classes Préparatoires aux Grandes Écoles</i> in the French teaching of descriptive geometry (1840–1910) <i>Evelyne Barbin</i>	49
Mathematics education in twentieth century Iceland – Ólafur Daniélsson's impact <i>Kristín Bjarnadóttir</i>	65
Teaching traditions in Swedish school algebra – a project description <i>Kajsa Bråting</i>	81
Lucienne Félix and Osvaldo Sangiorgi: Interchanges between two Bourbakist militants in the 1960s <i>Elisabete Zardo Búrigo</i>	93
From Lancaster to Pestalozzi – changing views of mathematics education in Latin America during the nineteenth century <i>João Bosco Pitombeira Fernandes de Carvalho</i>	109
The understanding of parallel lines in early nineteenth century textbooks: A comparison between two Norwegian geometry books from 1827 and 1835 <i>Andreas Christiansen</i>	123

Teaching the mathematical sciences in France during the eighteenth century: a few examples from some of the most used textbooks	137
<i>Sara Confalonieri</i>	
Modern mathematics at the 1959 OEEC Seminar at Royaumont	151
<i>Dirk De Bock, Geert Vanpaemel</i>	
Decimal fractions in school mathematics in Great Britain and North America, 1667–1887	169
<i>Nerida F. Ellerton, M. A. (Ken) Clements</i>	
Francesco Severi and mathematics teaching in secondary schools. Science, politics and schools in the first half of the twentieth century	187
<i>Livia Giacardi, Alice Tealdi</i>	
Problems in old Russian textbooks: How they were selected	203
<i>Alexander Karp</i>	
Warren Colburn and the inductions of reason	219
<i>Jeremy Kilpatrick</i>	
Abraham Gotthelf Kästner and his “Mathematische Anfangsgründe”	233
<i>Desirée Krüger</i>	
Change and stability: Dutch mathematics education, 1600–1900	245
<i>Jenneke Krüger</i>	
Emma Castelnuovo’s commitment to creating a new generation of mathematics teachers	263
<i>Marta Menghini</i>	
Fortification teaching in seventeenth century French Jesuit colleges	279
<i>Frédéric Métin</i>	
American mathematical journals and the transmission of French textbooks to the USA	293
<i>Thomas Preveraud</i>	
Swedish mathematics curricula, 1850–2014. An overview	309
<i>Johan Prytz</i>	
Academics, textbooks and reform of mathematics education in secondary French schools (1890–1905)	327
<i>Hervé Renaud</i>	

Epistemology, methodology, and the building of meaning in a new community of mathematics educators in England, 1950–1980 <i>Leo Rogers</i>	345
Analytical geometry in <i>An elementary treatise on plane and spherical trigonometry, and on the application of algebra to geometry</i> by S. F. Lacroix <i>Isabel María Sánchez, María Teresa González Astudillo</i>	361
Maximum and minimum: Approaches to these concepts in Portuguese textbooks <i>Ana Santiago, María Teresa González Astudillo</i>	377
The emergence of the profession of mathematics teachers – an international analysis of characteristic patterns <i>Gert Schubring</i>	389
“Sickened by set theory?” – New Maths at German primary schools (abstract) <i>Tanja Hamann</i>	405
The autonomy of secondary school mathematics culture (abstract) <i>José Matos</i>	406
Arithmetic textbooks – on the origins of an European tradition (abstract) <i>Barbara Schmidt-Thieme</i>	407
Bento de Jesus Caraça: criticism and proposals for the mathematics teaching in Portugal in the 1940s (abstract) <i>Jaime Carvalho e Silva</i>	408
New geometries for old schools? (abstract) <i>Klaus Volkert</i>	409
